Print “Hello, world!”

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");
    return 0;
}
```

Print “Hello, world!”

```c
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
            Hello, world!
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
            "Hello, world!"
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
            "Hello, world!"    ← String
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!")
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!")  ← Function
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!")    ← log(x)
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!")    ⟵ sin(x)
    return 0;
}
```

Print “Hello, world!”

```c
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");
    return 0;
}
```

Print “Hello, world!”

```c
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");  ← End of sentence
    return 0;
}
```

Print “Hello, world!”

```
#include <stdio.h>
int main(void)
{
    printf("Hello, world!");
    return 0;
}
```

Add two numbers

Add two numbers

```
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4);
    return 0;
}
```

Add two numbers

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4);
    return 0;
}
```

Add two numbers

```
#include <stdio.h>
int main(void)
{
                    3 + 4
    return 0;
}
```

Add two numbers

```
#include <stdio.h>
int main(void)
{
    printf(      3 + 4)
    return 0;
}
```

Add two numbers

```
#include <stdio.h>
int main(void)
{
    printf("%d"  3 + 4)  ← Format String
    return 0;
}
```

Add two numbers

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4)  ← Separator
    return 0;
}
```

Add two numbers

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4); ← End of sentence
    return 0;
}
```

Add two numbers

```
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4);
    return 0;
}
```

Calculator

Calculator

```
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4);
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 + 4); ← Addition
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 - 4); ← Subtraction
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 * 4); ← Multiplication
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 / 4); ← Division
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 3 % 4); ← Modulus (Remainder)
    return 0;
}
```

Calculator

```
#include <stdio.h>
int main(void)
{
    printf("%d", 3 % 4); ← 3
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 4 % 3);
    return 0;
}
```

Calculator

```c
#include <stdio.h>
int main(void)
{
    printf("%d", 4 % 3); ← 1
    return 0;
}
```

Addition

Addition

```
#include <stdio.h>
int main(void)
{

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
        a, b

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
        a, b  ← Variables

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
        a, b  ← Variables -- Type?

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b  ← Variables Integer.

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;

    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
                    a + b
    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf(      a + b)
    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d"  a + b)
    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d", a + b)
    return 0;
}
```

Addition

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d", a + b);
    return 0;
}
```

Swapping two variables

Swapping two variables

```
#include <stdio.h>
int main(void)
{

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
        a, b  ← Variables

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b  ← Type

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b; ← Separator

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d", a);

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d", a); ← 3

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b;
    a = 3;
    b = 4;
    printf("%d", a); ← 3
    printf("%d", b); ← 4

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
int main(void)
{
    int a, b, t;
    a = 3;
    b = 4;
    printf("%d", a); ← 3
    printf("%d", b); ← 4

    return 0;
}
```

Swapping two variables

```
#include <stdio.h>
